

Ahmed Nasser

**Front-End Web Developer | React.js & Next.js Specialist | Responsive UI/UX |
Tailwind CSS | TypeScript | JavaScript**

Cairo, Egypt | +20 10 686 920 41 | ahmednnasser111@gmail.com | LinkedIn | NPM Profile

Professional Summary

Frontend Web Developer with 5+ years of experience building high-performance web applications and enterprise-grade dashboards with React.js and Next.js — including independently architecting and delivering a full-scale cybersecurity intelligence dashboard as sole frontend owner. Skilled at transforming complex, data-heavy requirements — SaaS ERP systems, security intelligence platforms, analytics dashboards — into fast, intuitive user experiences. Proven collaborator across cross-functional teams in travel, insurance, education, hospitality, and cybersecurity sectors, with expertise in performance optimization (SSR, code splitting, lazy loading), state management, authentication & RBAC systems, and scalable component architecture.

Core Competencies

React.js · Next.js (App Router, SSR, ISR, PPR) · TypeScript · JavaScript (ES6+) · State Management (Redux Toolkit, Zustand) · TanStack Query · Tailwind CSS · RBAC & Authentication · REST APIs & WebSockets · Performance Optimization · Responsive Design & UI/UX · SaaS Dashboard Architecture

Technical Skills

- **Core Technologies:** JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3
- **Next.js & Rendering:** App Router, Server-Side Rendering (SSR), Incremental Static Regeneration (ISR), Partial Prerendering (PPR)
- **State Management:** Redux Toolkit, Zustand, React Context API, Signals

- **Styling & UI:** Tailwind CSS, MUI, Shadcn/UI, Headless UI, RizzUI, Styled-components
- **Data Fetching & APIs:** TanStack Query (React Query), Axios, RESTful APIs, WebSockets
- **Dashboards & Access Control:** Enterprise dashboards, real-time data visualization, role-based access control (RBAC), authentication & session management, multi-module SaaS UIs
- **Testing & CI/CD:** Unit & component testing, GitLab CI, automated deployment workflows
- **Architecture & Tools:** Git, Vite, Webpack, Performance Optimization, SEO Best Practices, Responsive Design

Professional Experience

Frontend Developer — E2E County

Cairo, Egypt | Jan 2026 – Present

Featured Project — Cyber-Guardian Intelligence: Threat Intelligence Dashboard (Sole Frontend Developer)

- Served as the **Sole Frontend Developer, independently building the entire frontend application from scratch** for a cybersecurity intelligence SaaS platform spanning dark web surveillance, phishing & domain protection, vulnerability prioritization, and threat intelligence.
- **Independently developed** a Next.js dashboard covering credential monitoring, brand protection, VIP monitoring, and incident management, featuring complex nested and expandable interfaces, advanced data tables, filtering, and search.
- Built breach-trend analytics and incident risk-scoring visualizations **from scratch**, optimized for large, high-volume datasets.
- Designed and implemented a complete Role-Based Access Control (RBAC) system supporting Admin, Analyst, and Viewer permission tiers.

- Established a performant, responsive, reusable component architecture as sole frontend owner, setting the scalability standard for the platform.

Environment: Next.js, React.js, TypeScript, Tailwind CSS, RBAC, SaaS Dashboard

Additional Contributions

- Collaborated with cross-functional engineering teams to build high-performance Next.js interfaces for TravWare, a SaaS ERP ecosystem serving the travel industry.
- Contributed to scalable UI components for e-commerce booking engines (DMCs, OTAs, hotel partners) and implemented assigned frontend features for real-time inventory management tooling (Ecosystem 2.0), integrating complex APIs to ensure platform-wide data consistency.
- Participated in the development of a unified social media management dashboard, working closely with backend developers and designers to consolidate multiple accounts into a single interface.
- Partnered with product, design, and engineering teams to optimize frontend workflows for Corporate, MICE, and Leisure sectors, validating technical feasibility of new designs.

Environment: Next.js, React.js, TypeScript, Tailwind CSS, SaaS ERP

Frontend Developer — INCode

Cairo, Egypt | Feb 2024 – Dec 2025

- Architected an enterprise-grade school management platform (Elli) integrating quiz engines, assignment tracking, automated scheduling, and role-based permissions for administrators, teachers, and students.
- Engineered the management dashboard for a MENA-focused Voice AI platform (Olimi.ai) supporting 20+ languages/dialects, real-time analytics (Intent Accuracy, CSAT), AI call summaries, sentiment analysis, and knowledge base integrations.
- Built high-performance analytics dashboards for insurance and education clients (Deraya), improving data visualization and real-time reporting.

- Delivered a multi-brand restaurant management system (Eatery, Kokomo & Otto) with a centralized dashboard for managing brands, branches, and dynamic digital menus.
- Built a Shopify-integrated dashboard (Convst) to streamline payment installments and supplier management with real-time cash-flow analytics.
- Developed a grocery price comparison platform (Karnly) spanning major retail chains, engineering high-concurrency scraping and data normalization pipelines.
- Built a management dashboard (Beesly AI) for an AI-powered virtual secretary, enabling real-time call monitoring, booking visualization, and conversation analytics.

Environment: Next.js, TypeScript, TanStack Query, React Hook Form, Zod, Tailwind CSS, RizzUI

Frontend Developer — Mazeed

Cairo, Egypt | Apr 2022 – Feb 2024

- Designed and built a centralized meeting management platform, streamlining scheduling and collaborative workflows across departments.
- Developed a secure, high-concurrency voting application with robust authentication and live results synchronization.
- Maintained and scaled a task management system, improving team productivity through optimized tracking and UI/UX.
- Contributed to a committee management platform automating administrative workflows and implementing role-based permissions for large-scale organizations.

Environment: React.js, Redux, Tailwind CSS, React Hook Form, Yup, i18next

Freelance Projects

- **Ajzaa** — Engineered a multi-tenant e-commerce vendor & admin dashboard with multi-store onboarding, RBAC, real-time chat support, and analytical reporting. *(React.js, Redux, Tailwind CSS, Pusher)*

- **Rayan** — Built a mission-critical water distribution platform for Hajj season, including distribution-point tracking and supervisor evaluation tools. *(Next.js, TypeScript)*
- **Kenzytours, Kemet Travel, First Mas & HighSkyView** — Developed high-performance tourism platforms using Next.js SSR for superior SEO, fast page transitions, and complex booking/search flows. *(Next.js, TypeScript, Tailwind CSS)*
- **Baian AI** — Engineered an AI-driven invoice extraction platform with Zoho Books integration and automated Odoo/WhatsApp workflows. *(Next.js, AI, SaaS)*
- **ShodShop** — Built a price comparison platform enabling users to compare prices across multiple stores. *(Next.js, TypeScript, Tailwind CSS)*
- **Gallery Zidan** — Built a showcase website for a heritage classic-furniture restoration and manufacturing business (est. 1940), specializing in repair, gilding, and French furniture craftsmanship. *(Next.js, TypeScript, Tailwind CSS)*
- **SeenShow & Kayef Partners** — Delivered a movie streaming platform UI and enterprise landing pages for corporate clients. *(Next.js, TypeScript, Tailwind CSS, Shadcn/UI)*

Community Contributions

Active open-source contributor, publishing and maintaining NPM libraries used by React and Next.js developers worldwide.

Education

Bachelor of Commerce — Helwan University | 2014 – 2020

Self-taught frontend engineer, continuously building expertise in modern web architecture since 2015.

Languages

Arabic: Native | English: Professional Working Proficiency
