PROFESSIONAL SUMMARY

Front-End Developer with 4+ years of experience in **React.js**, **Next.js**, **TypeScript**, **JavaScript**, and **Tailwind CSS**. Converts Figma designs to code with a strong UI/UX eye, writing clean code, reusable components, and clean architecture based on React design patterns and best practices. Specialized in frontend performance engineering (**Core Web Vitals**), technical SEO, generative engine optimization (GEO), AI optimization (AIO), and frontend security (XSS, CSRF, CSP). Uses AI coding agents (**Claude Code**, **OpenCode**) daily and publishes open-source React and Next.js tools. Builds enterprise SaaS dashboards and responsive web applications for real clients in Saudi Arabia and Egypt, shipping products to production both solo and within teams, and handling production releases, bug fixes, and hotfixes.

TECHNICAL SKILLS

- **Languages & Runtime:** JavaScript (ES6+), TypeScript, Node.js, HTML5, CSS3, SASS/SCSS
- **Frameworks:** React.js, Next.js (App Router, React Server Components, Server Actions, SSR, SSG, ISR, PPR)
- **Frontend Architecture & Design Patterns:** Clean architecture, feature-based structure, custom hooks, design systems
- **Frontend Performance Engineering:** Core Web Vitals, performance optimization, code splitting, lazy loading
- **SEO, GEO & AIO:** Technical SEO, structured data, metadata, generative engine optimization (GEO), AI optimization (AIO)
- **Frontend Security:** XSS & CSRF prevention, Content Security Policy (CSP), input validation, dependency audits
- **State Management:** React Hooks, Redux Toolkit, Zustand, React Context API
- **Data Fetching & APIs:** TanStack Query (React Query), Axios, RESTful APIs, WebSockets, Pusher
- **Forms & i18n:** React Hook Form, Zod, Yup, i18next (internationalization)
- **Styling & Component Libraries:** Tailwind CSS, Bootstrap, MUI, Shadcn/UI, Headless UI, Styled-components
- **Responsive Design & UI/UX:** Figma to code, cross-browser compatibility, Accessibility (WCAG), Framer Motion
- **Dashboards & Auth:** Enterprise SaaS dashboards, data visualization, RBAC, authentication & session management
- **AI-Assisted Development:** Claude Code, OpenCode, AI coding agents, prompt engineering, AI-assisted debugging
- **Testing & CI/CD:** Vitest (unit testing), Playwright (end-to-end testing), GitLab CI/CD, Git, Vite, Webpack
- **Task Management:** Jira, Azure DevOps (Azure Boards)

PROFESSIONAL EXPERIENCE

Frontend Developer | E2E County

Jan 2026 – Present | Cairo, Egypt (On-site)

Cyber-Guardian Intelligence: Threat Intelligence SaaS Dashboard (Sole Frontend Developer)

- Built the full Next.js frontend from scratch for a cybersecurity platform covering dark web surveillance, phishing & domain protection, vulnerability prioritization, and threat intelligence.
- Developed modules for credential monitoring, brand protection, VIP monitoring, and incident management, with nested and expandable views, advanced data tables, filtering, and search.
- Created breach-trend analytics and incident risk-scoring visualizations optimized for large, high-volume datasets.
- Designed a complete **Role-Based Access Control (RBAC)** system with Admin, Analyst, and Viewer tiers.
- Set up a reusable, responsive component architecture shared across the platform's modules.

Social Media Management Dashboard (Team Project)

- Co-developed a unified **social media management dashboard** that handles multiple accounts from one interface.
- Built key modules: a **content calendar**, a **unified inbox** for messages and comments, and **analytics & reporting**.
- Implemented reusable Next.js and TypeScript components, integrating REST APIs with backend and design teams.

TravWare: SaaS ERP for Corporate, MICE & Leisure Travel (Team Project)

- Built ERP interfaces used in production by travel clients, working with product, backend (Laravel), and design teams.
- Fixed an ERP page that froze at 2,000 rows per page by splitting a monolithic component into focused components and moving filter values from state to useRef, eliminating re-renders on every filter change.
- Delivered a SaaS booking engine for flights and hotels (DMCs, OTAs, hotel partners) in Next.js, with dynamic pages and a dashboard where each client toggles homepage sections and branding; now tailoring it for large travel companies.

Environment: Next.js, React.js, TypeScript, Tailwind CSS, REST APIs, Claude Code, OpenCode

Frontend Developer | INCode

Feb 2024 – Dec 2025 | Cairo, Egypt (Hybrid)

- Joined as the sole frontend developer, owning production releases, client change requests, and hotfixes.

- Engineered the dashboard for **Olimi.ai**, a MENA-focused Voice AI platform (first client: **Paymob**), with real-time analytics (Intent Accuracy, CSAT), AI call summaries, sentiment analysis, and knowledge base integrations.
- Shipped the dashboard for **Beesly AI**, an AI-powered virtual secretary, with live call monitoring, booking visualization, and conversation analytics.
- Architected and built **Elli** single-handedly in about 6 months, an enterprise school management platform with courses, semesters, quiz engines, assignment tracking, automated scheduling, and role-based permissions for administrators, teachers, and students; first adopted by **Forsan International Schools** (British & American).
- Built analytics dashboards for insurance and education clients, including **Deraya Insurance**.
- Led two junior developers and reviewed their code to deliver a multi-tenant restaurant system for three brands under one owner (Eatery, Kokomo & Otto), with a centralized dashboard for brands, branches, and dynamic digital menus.
- Implemented a Shopify-integrated dashboard (**Convest**) for payment installments and supplier management with cash-flow analytics.
- Created **Karnly**, a grocery price comparison platform across retail chains, with scraped, normalized price data.

Environment: Next.js, React.js, TypeScript, TanStack Query, React Hook Form, Zod, Tailwind CSS, RizzUI

Frontend Developer | Mazeed

Apr 2022 – Feb 2024 | Remote

- Migrated the company's legacy HTML, Bootstrap, and jQuery products to React in a team of 4 frontend developers, delivering for Saudi clients including **Monsha'at** (SME General Authority) and **Takaful**.
- Built a centralized meeting management platform that streamlined scheduling and collaboration across departments.
- Engineered a secure voting application with authentication and live results sync.
- Maintained and extended a task management system, refining its tracking flows and UI/UX.
- Refactored production code into pure components to cut unnecessary re-renders.
- Optimized Core Web Vitals across all Mazeed platforms, fixed production bugs, and mentored a junior developer.

Environment: React.js, Redux, Tailwind CSS, React Hook Form, Yup, i18next

FREELANCE PROJECTS (PART-TIME)

Client work alongside full-time roles, all sourced through referrals from previous clients.

- **Ajzaa:** Built a multi-tenant e-commerce vendor & admin dashboard for a Saudi auto-parts marketplace, with multi-store onboarding, RBAC, live chat support, delivery tracking, ratings, and analytics. (React.js, Redux, Tailwind CSS, Pusher)
- **Baian AI:** Engineered an AI-driven invoice extraction platform with Zoho Books integration and automated Odoo/WhatsApp workflows. (Next.js, Zoho Books, Odoo, WhatsApp)
- **Rayan:** Delivered a mission-critical water distribution platform for Hajj season with distribution-point tracking and supervisor evaluation tools. (Next.js, TypeScript)
- **Kenzy Tours, Kemet Travel, First Mas & HighSkyView:** Developed tourism platforms with Next.js server-side rendering (SSR), optimized for Core Web Vitals and SEO, with fast page transitions and complex booking/search flows; Kenzy Tours and First Mas rank on Google for Hajj, Umrah, and tourism searches. (Next.js, TypeScript, Tailwind CSS)
- **ShodShop, Gallery Zidan, SeenShow & Kayef Partners:** Built a multi-store price comparison platform, a showcase site for a heritage furniture business, a movie streaming UI, and enterprise landing pages. (Next.js, TypeScript, Tailwind CSS, Shadcn/UI)

OPEN SOURCE

- **Next.js & React Security Auditor:** Developed an OpenCode skill that audits Next.js App Router apps for XSS and injection, authentication, Server Actions, Route Handlers, CSRF/SSRF, CSP, open redirects, and dependency risks. github.com/AhmedNnasser11/nextjs-react-security
- **Next.js Architecture Lab:** Built a reference implementation of modern Next.js 16 / React 19 architecture — Server vs. Client Components, Suspense streaming, URL-synced state, optimistic UI, and feature-based structure — with a live demo. (Next.js, React, TypeScript) github.com/AhmedNnasser11/nextjs-architecture-lab
- **Technical SEO & GEO Auditor:** Created an AI auditing skill for Claude Code that reviews sites and codebases for technical SEO, structured data, accessibility, and generative engine optimization (GEO). github.com/AhmedNnasser11/technical-seo-geo-claude-skill
- **NPM Libraries:** Published 6 open-source NPM packages for React, Next.js, and Node.js developers. npmjs.com/~ahmednnasser111

EDUCATION & LANGUAGES

Bachelor of Commerce | Helwan University | 2020

Self-taught frontend engineer through online learning since 2015.

Languages: Arabic (Native) | English (Professional Working Proficiency)
